1.0 Introduction

- 1.1 This Technical Note is being submitted in support of a planning application for the construction of five travellers pitches on land located east of the B4009 to the north of Hermitage, near Thatcham (herein referred to as 'the site').
- 1.2 The National Planning Policy Framework (NPPF) 2023 sets out the Government's planning policies for England and how they are expected to be applied. Paragraph 111 states that "*development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe*".
- 1.3 The following paragraphs demonstrate how the proposals will not create an unacceptable impact on highway safety and so should be allowed in accordance with the NPPF.

2.0 Site Context

2.1 The site lies to the eastern side of the B4009, to the north of Hermitage. The B4009 is a two-way single carriageway within the vicinity of the access road, and is subject to a 30 miles per hour speed limit. To the north the road becomes national speed limit of 60 miles per hour. The site lies 1.5km north-east of the village centre of Hermitage, although additional facilities are located close to the site. The surrounding area can be categorised as residential and agricultural; the location of the site is shown in Figure 2.1 below.

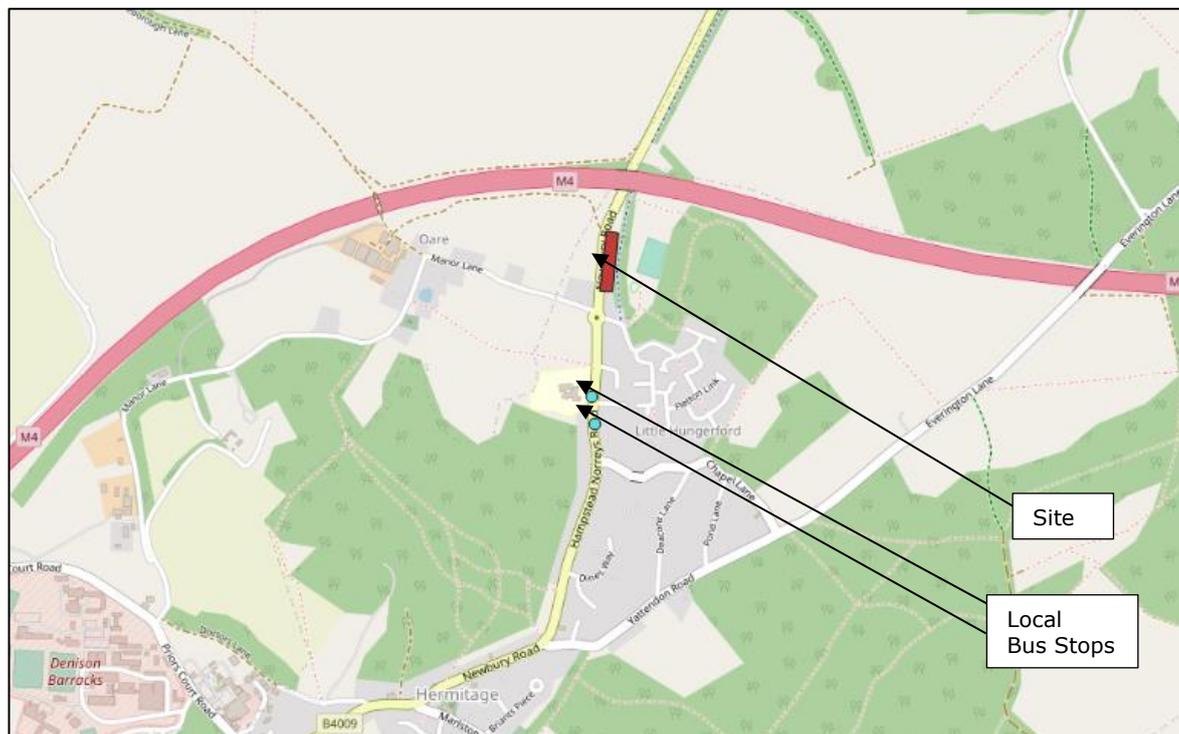

Figure 2.1 - Site Location

Accessibility

Accessibility by Foot and Cycle

2.2 There is a footpath close to the site access which ends approximately 10 metres south of the access, however due to the straightness of the B4009, pedestrians would be able to see vehicles approaching and vice versa. Footways are along local roads to bus stops and local facilities.

2.3 There are no cycle paths, however due to the low speeds and relatively flat gradient of the B4009, and the surrounding road network, it is deemed an acceptable and safe route for cyclists.

Accessibility by Bus

2.4 The closest bus stop is located approximately 170 metres south of the site along Hampstead Norreys Road, which serves the number 6 bus. The frequency of this service is highlighted in the table below.

Service Number	Route	Midweek Frequency	Saturday Frequency	Sunday Frequency
6	Newbury Station – Hermitage – Compton – East Ilsley- West Ilsley	Every 2 hours	Every 2 hours	N/A

Table 2.1 – Local Bus Services

Local Amenities

- 2.5 The site lies 1.5km north-east of the village centre of Hermitage, a 19-minute walk or 6-minute cycle, where a number of local amenities can be accessed. Further amenities can be accessed close to the south of the site. The table below outlines some of the local amenities that can be accessed.

Amenity	Distance (metres)	Walking (minutes)	Cycling (minutes)
Hermitage Village Hall	160	2	1
Local Bus Stop	170	2	1
Hermitage Primary School	260	3	1
Hermitage Post Office	1,100	13	3
Co-op Food – Hermitage	1,600	19	5
Hillier Garden Centre	2,000	24	7

Table 2.2 – Local Amenities

Summary

- 2.6 In summary, the site has a good level of accessibility by public transport and to local amenities, on foot and by cycle. The site location means that everyday local amenities can also be accessed via non-car modes of travel.

3.0 Development Proposals

- 3.1 The proposals seek planning permission for five static caravan sites within the site, alongside the provision of day rooms and touring caravans. Access will be taken off the B4009 at the current existing access. The proposed site layout is attached in **Appendix A**.

Access Arrangements

- 3.2 Vehicular and pedestrian access to the site will be via the existing access point along the B4009. ATCs were placed to the north of the access from Tuesday 20th June to Monday 26th June to capture approaching vehicle speeds. The raw survey data is attached as **Appendix B**.
- 3.3 Southbound speeds were recorded as 37.6mph, which when adjusted to account for wet weather conditions triggers a need for the use of Design Manual for Roads and Bridges (DMRB) standards. Applying the recorded speeds to the formula creates a requirement for visibility of 2.4m x 104 metres to the north. Visibility to the south extends to the roundabout junction to the south.
- 3.4 Visibility Splays are shown within **Appendix C**, which serves to demonstrate that adequate visibility can be achieved at the site access.
- 3.5 Swept path analysis has been undertaken showing a car towing a caravan in and out of the site and parking in one of the pitches. This can be seen within **Appendix D**.

Parking Provision

- 3.6 Each property will be equipped with two car parking spaces, in accordance with the West Berkshire 'Housing Site Allocations' of the site being within Zone 4.
- 3.7 Cycle Parking will be within accordance with West Berkshires 'Cycle and Motorcycle Advice and Standards for New Development'. On this basis, each plot will provide a minimum of 1 covered and protected cycle parking space.
- 3.8 As per guidance contained within the West Berkshire Parking Standards (Housing Site Allocations – 2014), all units will benefit from a fast charging unit for an electric vehicle.

Servicing and Refuse Collection

- 3.9 Refuse collection will take place on street, as currently operates for the other dwellings within the local area. Residents will wheel their rubbish to the edge of the site by the access on collection day, ensuring it does not block visibility or access or encroach on the carriageway.
- 3.10 Swept path analysis of a fire appliance has also been undertaken, which can be found in **Appendix D**. By demonstrating that a fire appliance can turn on site, it can be reasonably assumed that general deliveries can also be accommodated on site.

4.0 Trip Generation

- 4.1 This section outlines the level of trips that are likely to be generated by the proposed development. When assessing the impact of a residential development, it is generally considered that the peak traffic times are weekday mornings (08:00-09:00) and weekday evenings (17:00-18:00). It is during these periods that traffic flows associated with the development and those on the adjacent highway network are likely to be at their greatest. The information provided within this section considers these peak hours as well as the daily movements (07:00-19:00).
- 4.2 To calculate the trip attraction potential of five travellers' pitches, an assessment utilising the TRICS database has been undertaken. The TRICS category '03 Residential: Houses Privately Owned' has been used, with the following criteria:
- ▶ Sites located in England, excluding Greater London; and,
 - ▶ Sites classified as edge town and suburban areas.
- 4.3 The use of the above TRICS category is considered robust, and accounts for the lack of suitable travellers sites in the TRICS database. A summary of the peak hour total person and vehicular trip rates are provided in Table 4.1 below and the full TRICS output is included in **Appendix E**.

	Weekday AM Peak (08:00-09:00)		Weekday PM Peak (17:00- 18:00)		Weekday Daily Movements	
	Arr	Dep	Arr	Dep	Arr	Dep
Vehicular Trip Rates	0.240	0.392	0.360	0.224	2.766	2.751
Vehicular Trips	1	2	2	1	14	14
Person Trip Rates	0.416	0.768	0.640	0.408	5.013	5.038
Person Trips	2	4	3	2	25	25

Table 4.1 – Proposed Trip Rates

- 4.4 Table 4.1 indicates that the travellers' pitches could generate 3 two-way vehicular trips in both the morning and evening peak hours. Over an average weekday, the pitches could generate up to 28 two-way total vehicular trips. The trips outlined above would not have a detrimental impact to the highway network.

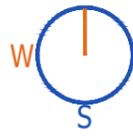

5.0 Conclusion

- 5.1 In view of the above, the proposed development is considered to be acceptable in transport terms and meets with local and national policy criteria. The assessment work undertaken has shown that there would not be any demonstrable harm arising from the proposed scheme and it will not cause any severe impacts. Therefore, there are no traffic and transport related reasons why the development should not be granted planning consent.

Traffic Survey Data

VEHICLE SPEED AND VOLUME SURVEY – B4009, HERMITAGE, THATCHAM RG18 9WL.

DATASETS:

Site: [Hermitage] B4009 Hermitage, on speed change sign.

Direction: 7 - North bound A>B, South bound B>A. Lane: 0

Survey Duration: 00:00 20 June 2023 => 00:00 27 June 2023

File: Hermitage27Jun2023.EC0 (Plus)

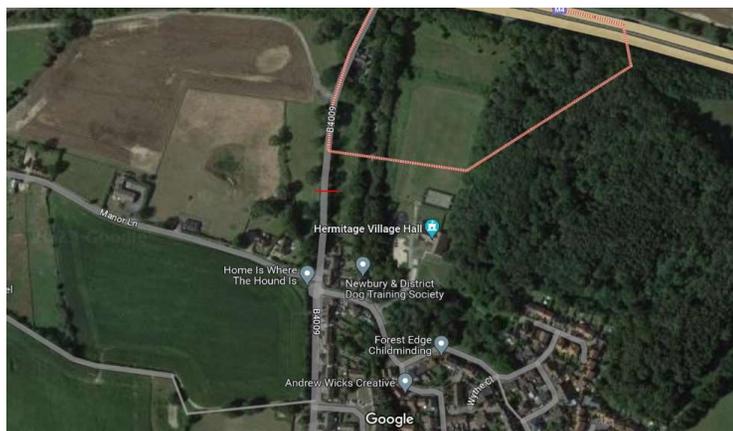

Algorithm: Advanced.

PROFILE:

Included classes: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13

Speed range: 0 - 80 mph.

Units: Non-Metric (ft, mi, f/s, mph, lb, ton).

DEFINITIONS / ABBREVIATIONS*

Time - Time period commencing. (1-hour summaries given).

Total - Total number of vehicles counted in time period.

RunTot - Running or cumulative total of vehicles over survey period.

Vbin

30 (eg) - Number of vehicles between 30 and 35 mph (30.0 – 34.9).

35

Mean - Mean speed.

Vmin - Minimum speed.

Vmax - Maximum speed.

n> PSL 30 - Number of vehicles exceeding Posted Speed Limit (30 mph).

%> PSL 30 - Percentage of vehicles exceeding Posted Speed Limit (30 mph).

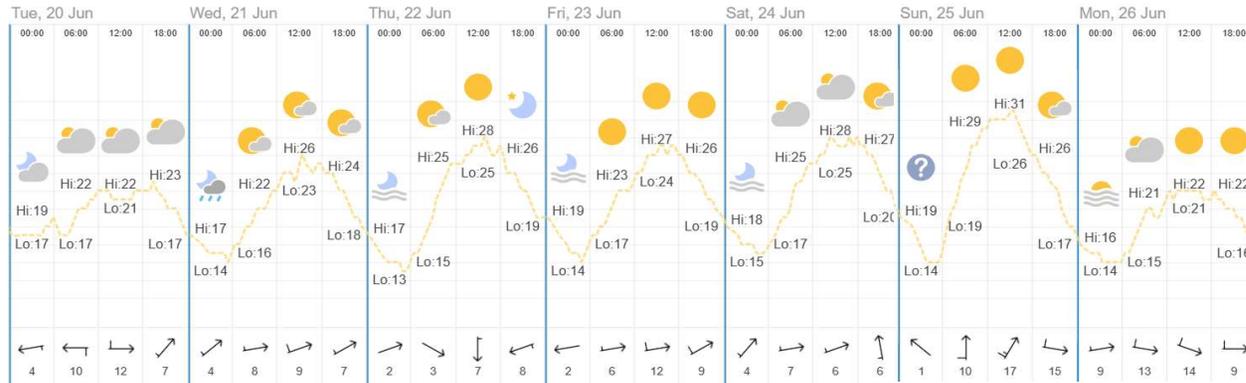

Vpp 85 - 85th percentile speed.

*Not all definitions may be used in a single report.

VEHICLE CLASSES

- 1 **Bicycle**
- 2 **Motor Cycle**
- 3 **Car / Van** (cars and vans - without trailer).
- 4 **Car / Van (T)** (cars and vans towing trailer).
- 5 **R2 / Bus** (HGV / bus 2-axle rigid).
- 6 **R3 / Bus** (HGV / bus 3-axle rigid).
- 7 **R4** (HGV 4-axle rigid).
- 8 **A3** (HGV 3-axle articulated).
- 9 **A4** (HGV 4-axle articulated).
- 10 **A5** (HGV 5-axle articulated).
- 11 **A6** (HGV 6-axle articulated).
- 12 **A6 [2]** (HGV 6-axle articulated comprising two trailers).
- 13 **A7 [2]** (HGV 7 + axle articulated comprising two trailers).

TRICS Output

Calculation Reference: AUDIT-734001-230714-0724

TRIP RATE CALCULATION SELECTION PARAMETERS:

Land Use : 03 - RESIDENTIAL
 Category : A - HOUSES PRIVATELY OWNED
 MULTI-MODAL TOTAL VEHICLES

Selected regions and areas:

01	GREATER LONDON EN ENFIELD	1 days
02	SOUTH EAST HF HERTFORDSHIRE KC KENT MW MEDWAY	1 days 1 days 1 days
04	EAST ANGLIA NF NORFOLK SF SUFFOLK	1 days 1 days
07	YORKSHIRE & NORTH LINCOLNSHIRE NY NORTH YORKSHIRE	1 days
10	WALES VG VALE OF GLAMORGAN	1 days
15	GREATER DUBLIN DL DUBLIN	1 days
16	ULSTER (REPUBLIC OF IRELAND) DN DONEGAL	1 days

This section displays the number of survey days per TRICS® sub-region in the selected set

Primary Filtering selection:

This data displays the chosen trip rate parameter and its selected range. Only sites that fall within the parameter range are included in the trip rate calculation.

Parameter: No of Dwellings
 Actual Range: 6 to 19 (units:)
 Range Selected by User: 4 to 20 (units:)

Parking Spaces Range: All Surveys Included

Parking Spaces per Dwelling Range: All Surveys Included

Bedrooms per Dwelling Range: All Surveys Included

Percentage of dwellings privately owned: All Surveys Included

Public Transport Provision:

Selection by: Include all surveys

Date Range: 01/01/15 to 14/09/22

This data displays the range of survey dates selected. Only surveys that were conducted within this date range are included in the trip rate calculation.

Selected survey days:

Monday	2 days
Tuesday	1 days
Wednesday	7 days

This data displays the number of selected surveys by day of the week.

Selected survey types:

Manual count	10 days
Directional ATC Count	0 days

This data displays the number of manual classified surveys and the number of unclassified ATC surveys, the total adding up to the overall number of surveys in the selected set. Manual surveys are undertaken using staff, whilst ATC surveys are undertaken using machines.

Selected Locations:

Suburban Area (PPS6 Out of Centre)	2
Edge of Town	8

This data displays the number of surveys per main location category within the selected set. The main location categories consist of Free Standing, Edge of Town, Suburban Area, Neighbourhood Centre, Edge of Town Centre, Town Centre and Not Known.

This data displays the number of surveys per location sub-category within the selected set. The location sub-categories consist of Commercial Zone, Industrial Zone, Development Zone, Residential Zone, Retail Zone, Built-Up Zone, Village, Out of Town, High Street and No Sub Category.

Inclusion of Servicing Vehicles Counts:

Servicing vehicles Included	4 days - Selected
Servicing vehicles Excluded	6 days - Selected

Secondary Filtering selection:

Use Class:

C3	10 days
----	---------

This data displays the number of surveys per Use Class classification within the selected set. The Use Classes Order (England) 2020 has been used for this purpose, which can be found within the Library module of TRICS®.

Population within 500m Range:

All Surveys Included

Population within 1 mile:

1,001 to 5,000	2 days
10,001 to 15,000	4 days
15,001 to 20,000	2 days
20,001 to 25,000	1 days
25,001 to 50,000	1 days

This data displays the number of selected surveys within stated 1-mile radii of population.

Population within 5 miles:

5,000 or Less	1 days
25,001 to 50,000	2 days
50,001 to 75,000	2 days
125,001 to 250,000	3 days
250,001 to 500,000	1 days
500,001 or More	1 days

This data displays the number of selected surveys within stated 5-mile radii of population.

Car ownership within 5 miles:

0.6 to 1.0	5 days
1.1 to 1.5	5 days

This data displays the number of selected surveys within stated ranges of average cars owned per residential dwelling, within a radius of 5-miles of selected survey sites.

Travel Plan:

Yes	3 days
No	7 days

This data displays the number of surveys within the selected set that were undertaken at sites with Travel Plans in place, and the number of surveys that were undertaken at sites without Travel Plans.

PTAL Rating:

No PTAL Present	9 days
1a (Low) Very poor	1 days

This data displays the number of selected surveys with PTAL Ratings.

Covid-19 Restrictions	Yes	At least one survey within the selected data set was undertaken at a time of Covid-19 restrictions

This section provides a list of all survey sites and days in the selected set. For each individual survey site, it displays a unique site reference code and site address, the selected trip rate calculation parameter and its value, the day of the week and date of each survey, and whether the survey was a manual classified count or an ATC count.

TRIP RATE for Land Use 03 - RESIDENTIAL/A - HOUSES PRIVATELY OWNED

MULTI-MODAL TOTAL VEHICLES

Total Rates:			2.766			2.751			5.517

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: $COUNT/TRP*FACT$. Trip rates are then rounded to 3 decimal places.

The survey data, graphs and all associated supporting information, contained within the TRICS Database are published by TRICS Consortium Limited ("the Company") and the Company claims copyright and database rights in this published work. Parameter summary

Trip rate parameter range selected: 6 - 19 (units:)
Survey date date range: 01/01/15 - 14/09/22
Number of weekdays (Monday-Friday): 10
Number of Saturdays: 0
Number of Sundays: 0
Surveys automatically removed from selection: 0
Surveys manually removed from selection: 0

This section displays a quick summary of some of the data filtering selections made by the TRICS® user. The trip rate calculation parameter range of all selected surveys is displayed first, followed by the range of minimum and maximum survey dates selected by the user. Then, the total number of selected weekdays and weekend days in the selected set of surveys are shown. Finally, the number of survey days that have been manually removed from the selected set outside of the standard filtering procedure are displayed.
