

1.0 INTRODUCTION

- 1.1 David Tucker Associates (DTA) has been commissioned by CP Logistics UK Reading Propco Limited to prepare this Technical Note replying to comments received from consultees in relation to full planning application for the construction of two employment units for flexible uses within Class E (light industrial), B2 and/or B8 of the Use Classes Order (including ancillary office provision) with associated enabling works, access, parking and landscaping. The site plan is attached as **Appendix A**.
- 1.2 The comments received from West Berkshire Council (WBC) are attached as **Appendix B**, comments received from National Highways (NH) attached as **Appendix C**, and comments received from Transport Policy are attached as **Appendix D**.

2.0 WEST BERKSHIRE COUNCIL COMMENTS

2.1 Accessibility

"[...] the LHA previously recommended to have overlooking from the site onto Theale High Street. It is considered that the development should not be screened and turned away from this route, which is an important pedestrian and cycle route from Theale to Calcot. It is considered that overlooking will make it more of an attractive route and encourage more walking and cycling. The proposed buildings would not overlook this route and the plans show that there are no windows overlooking the proposed footway. The LHA therefore consider the proposed footpath to Theale High Street as unacceptable due to safety for users."

- 2.1.1 The pedestrian access to Theale High Street has been relocated to enable it to be more overlooked from the wider site. This makes it a more attractive route and satisfies the comments.

"To comply with Inclusive Mobility and improve pedestrian safety, the proposed internal footways must include the provision of dropped kerbs and tactile paving."

2.1.2 Dropped kerbs and tactile paving is identified on the site plan attached to this note at **Appendix A**.

2.2 Junction Assessments

"No survey data has been appended to the TA. To allow the LHA to review the baseline data used, the raw 2023 survey data must be appended to the TA."

2.2.1 The survey data is attached to this technical note as **Appendix E**.

"[...] the TA states that the following TEMPRO factors have been used to uplift the base traffic forecasts to 2033:

- AM – 1.0578
- PM – 1.0598

The LHA consider that the TEMPRO factors should be higher than those stated in the TA. Therefore, the applicant must confirm which TEMPRO parameters were used to determine these factors."

2.2.2 The TEMPRO factors provided in the TA were calculated using TEMPRO 7.2b as this was the latest version at the time of the TA being written. For comparison, TEMPRO rates using TEMPRO 8.1 have been calculated using the core scenario and these are:

- AM – 1.0473
- PM – 1.0471

2.2.3 As can be seen, the TEMPRO rates used (AM – 1.0578 and PM – 1.0598) are higher than those which would be used if the TA had been written after the publication of TEMPRO 8.1.

3.0 NATIONAL HIGHWAYS COMMENTS

"VISSIM modelling note as mentioned in paragraph 7.8 of the Transport Assessment."

- 3.1 As summarised in the TA, a VISSIM model was completed for applications 21/02029/COMIND and 20/00476/OUTMAJ which both proposed a greater quantum of floorspace than is now proposed. Despite this, the VISSIM model showed no problems at any of the junction tested. Given this, a re-run of the model is not considered necessary.

"Confirmation of [...] the committed developments included in the traffic forecasts."

- 3.2 No specific committed developments have been included in the traffic forecasts (which WBC have no issues with) as it is considered that any additional traffic from other planned sites would be included in the projected traffic increased in the local TEMPRO growth factors. Given that the Local Highway Authority have not required any specific committed developments, this methodology is considered robust.

- 3.3 *"Confirmation of [...] the development's opening year."*

- 3.4 The opening year for the development is unknown. However, 2028 can be assumed as a proxy which is the same as for Pincents Lane, a similar development on the opposite side of the M4 to the proposed development.

4.0 TRANSPORT POLICY COMMENTS

The site is in an accessible location with access to local walking, cycling and public transport routes. The footpath connection to the High Street on the north site boundary is welcomed, however the design of the proposed units should be reviewed so that is able to overlook this route to help improve natural surveillance and personal safety.

- 4.1 See **Section 2.1** above.

A Framework Travel Plan (FTP), prepared by David Tucker Associates (16th August 2023), has been submitted as part of the application. This is welcomed and will need to build on the accessible nature of the site by maximising opportunities for sustainable travel to/from the site. However, there are a few issues in the FTP that would need to be addressed before it can be considered acceptable.

- 4.2 The issues with the FTP have been picked up within the Travel Plan with an updated version submitted.

Appendix A

Proposed Site Layout

- Boundaries**
- Red Line Boundary
 - NDA
 - Security Fence

01 WASTE MANAGEMENT STORE
Concrete base with 2.4m high timber palisade fencing with galvanized structure.

02 BICYCLE STORE
Urban Engineering 'Series A' or similar and approved Polycarbonate transparent sheets with polyester powder coated steel frame.
Colour: White (BS00E55) Sheffield steel cycle racks or similar and approved to accommodate 10 cycles per shelter.

Arrangement and quantity of Cycle Stands within the Cycle Store area in accordance with planning requirements

Refer to site plan for location and positioning.

03 BOUNDARY SECURITY FENCE
Typical Paladin Fencing:
The perimeter of the service yards will be provided with 2.4m high paladin fencing. Post and panels to be black finish. Fences to be suitably set back from vehicular areas to reduce risk of accidental impact. Fencing / landscaping to be co-ordinated such that a maximum gap beneath fence is 100mm.

04 KNEE RAIL FENCING
Made from softwood guaranteed for 25 years. Galvanised strap for longer life 5 year treatment guarantee Height 1.20m with planned finish.

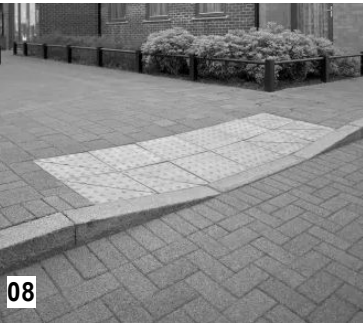

05 DOCK APRON RETAINING WALL
External retaining walls to the sides of the dock access will be also of fair faced concrete. Armco barrier galvanised mild steel and handrailing is to be provided adjacent to the retaining wall to level access ramps. The barrier uprights are to be surface fixed to the concrete.

06-07 VEHICLE AND PEDESTRIAN GATES:
To security sensitive areas near the main access road, vehicle gate is to be black steel paladin, 2.4m high to BS 1722-12:2006 (including concrete foundations). Gates to hinge open and be able to be held in the open position by providing bolt sleeves. Posts to be square section powder coated black steel with capped tops, cast in concrete bases.

07 AUTO CANTILEVERED SLIDING GATE
2.4m high Paladin automated sliding Gates.

08 DROPPED KERBS AND TACTILE PAVING

Subject: Consultee Comments for Planning Application 24/00145/FULMAJ

Consultee comments

Dear Sir/Madam,

A consultee has commented on a Planning Application. A summary of the comments is provided below.

Comments were submitted at 05/03/2024 8:38 PM from Mr Paul Goddard (Not Available) on behalf of Internal Highway Consultation.

Application Summary

Reference:	24/00145/FULMAJ
Address:	Land Bounded by Hoad Way and M4 and High Street Theale Reading
Proposal:	Full planning application for the construction of 2 employment units for flexible uses within Class E (light industrial), B2 and/or B8 of the Use Classes Order (including ancillary office provision) with associated enabling works, access from Hoad Way, parking and landscaping.
Case Officer:	Emma Nutchey

[Click for further information](#)

Comments Details

Comments: Hi Emma, Madeleine Hinde of WSP has viewed this case, and provides the following comments that I support

Full planning application for the construction of 2 employment units for flexible uses within Class E (light industrial), B2 and/or B8 of the Use Classes Order (including ancillary office provision) with associated enabling works, access from Hoad Way, parking and landscaping.

Documents Reviewed:

- David, Tucker Associates, Transport Assessment (TA), 16th August 2023;
- SGP, Design and Access Statement, September 2023;
- Turley, Planning Statement, January 2024; and
- SGP, Site Plan - drawing 8-095-SGP-ZZ-ZZ-DR-A-131001-P6.

Planning History

An application (Ref No: 21/02029/COMIND) was submitted for a similar proposal and was subsequently withdrawn. The LHA had requested the following information: -

- The proposals need to show pedestrian and cycle access onto the High Street as the new link would encourage trips to and from Calcot via the existing footpath across the M4 leading to Pincents Lane.
- A footway on the south and eastern internal boundary of the site access should be provided to improve safety as this would be within the site boundary DTA proposed layout would increase conflicts between vehicles (cars and HGVs) and pedestrians.
- Swept path Analysis should be shown for the worst accessible car parking space and also for the articulated vehicle entering and exiting the site access.

Since the withdrawal the applicant has made the following amendments which are relevant to highways: -

- The number of units has been reduced from three to two. The overall built footprint of the sites has been reduced from 172,976sq ft to 103,815sq ft.

- A footpath is proposed across the Site to provide access between Hoad Way and the High Street, connecting with the Ikea retail park to the northeast and the wider public right of way network within the AONB.

REVIEW OF TRANSPORT ASSESSMENT

Accidents (page 9 of the TA)

1. Five year accident data has been obtained for Hoad Way, the High Street, A4 Bath Road and M4 J12 roundabout. The analysis shows that there have been no personal injury collisions on Hoad Way. There were 13 accidents recorded in the remaining vicinity of the site which were as a result of driver error and not related to highway layout. There is therefore no concern with highway safety.

Accessibility (pages 9-12 of the TA)

Walking and Cycling

2. There are good pedestrian links from the site into Theale, to the west of the site with footways on the northern side of Hoad Way along the frontage of the site providing access to the High Street.

3. There are no formal cycle facilities within the vicinity of the site. However, Hoad Way is subject to a 30mph speed limit.

4. To encourage walking and cycling to the site and improve safety for pedestrians and cyclists, a footpath is proposed from the north of the site linking to the High Street. This is shown on drawing 8-095-SGP-ZZ-ZZ-DR-A-131001-P6. The requirement for this link was requested at pre-application stage and is therefore welcomed. It will provide a sustainable travel link to the northeast and the wider public right of way network within the AONB.

5. However, the LHA previously recommended to have overlooking from the site onto Theale High Street. It is considered that the development should not be screened and turned away from this route, which is an important pedestrian and cycle route from Theale to Calcot. It is considered that overlooking will make it more of an attractive route and encourage more walking and cycling. The proposed buildings would not overlook this route and the plans show that there are no windows overlooking the proposed footway. The LHA therefore consider the proposed footpath to Theale High Street as unacceptable due to safety for users.

6. To comply with Inclusive Mobility and improve pedestrian safety, the proposed internal footways must include the provision of dropped kerbs and tactile paving.

Public Transport

7. There are frequent bus services within 200m of the site on the High Street. These provide services to Reading, Newbury, Calcot and Thatcham.

8. Theale railway station is located approximately 900m to the south west of the site providing links to Reading, Newbury, Bedwyn and London Paddington.

9. It can be concluded that the site is within a sustainable location.

Vehicle Access (page 14 of the TA)

10. The proposed access will form a priority junction with Hoad Way. The indicative site access plan (drawing 20168-0c1) shows the access will achieve the required visibility splays of 50m to the east and 48m to the west.

11. At the pre-application stage, the LHA requested that a right turn lane and ghost island at the new site access should be considered. The applicant considers that this will not be necessary as demonstrated by the junction capacity assessment for the new access.

Car Parking (pages 15-16 of the TA)

12. The applicant has assessed the level of car parking based on land uses General and Special Industrial B2 – B7 and storage and distribution B8. The area schedule for each unit showing the following: -

- Unit 1: 4,893sq.m; and

- Unit 2: 4,700sq.m.

13. The TA shows that based on B2-B7 use, the maximum required provision for unit 1 would be 95 spaces and for B8 use 31 spaces. It is proposed that 60 parking spaces will be provided, included 4 disabled bays. This is considered acceptable.

14. The maximum required provision for unit 2 would be 106 spaces and for B8 use 33 spaces. It is proposed that 60 parking spaces will be provided, included 4

disabled bays. This is considered acceptable.

15. Therefore overall, the proposals will provide 120 car parking spaces. The TA states that electric vehicle charging points will be provided at both units. This is acceptable.

16. Swept path analysis has been provided for a large car and this is considered acceptable.

17. The proposals also include 20 HGV bays located within the proposed service yards. Swept path analysis has been undertaken for a 16.5m articulated vehicle for both the service yards and the site access. This is considered acceptable.

Cycle and Motorcycle Parking (Pages 16-17 of the TA)

16. The provision of cycle and motorcycle parking has been considered based on the Cycle and Motorcycle Advice and Standards for New Development (November 2014). This has been assessed based on the standards for B1/B2 land uses which have the same recommended standards. The level of cycle/motorcycle parking has also been calculated based on the total floor area for each unit.

17. The proposed cycle provision for Unit 1 will be 20 cycle spaces and 5 motorcycle spaces and Unit 2 also proposes 20 cycle spaces and 5 motorcycle spaces. This provision exceeds the cycle parking standards and is therefore considered acceptable.

18. The proposals plan (drawing 8-095-SGP-ZZ-ZZ-DR-A-131001-P6) shows the location of the cycle parking adjacent to the proposed building entrances. Cycle parking will be provided in the form of Sheffield stands within a covered cycle store. This is considered acceptable.

Traffic Impact (Pages 18-20 of the TA)

Traffic Generation

19. Trip generation has been calculated using TRICS and based on a selection criteria of Employment / Industrial Unit for the total floor area, therefore the worst case scenario. The parameters used are considered acceptable.

20. Table 9 in the TA shows that there would be 42 arrivals and 17 departures in the AM peak period (08.00-09.00) and 12 arrivals and 36 departures in the PM peak period (17.00-18.00).

Traffic Distribution

21. The distribution of development trips has been assessed based on Journey to Work Census 2011 data and this is acceptable.

Junction Assessments (Pages 21-24 of the TA)

22. The junctions assessments have been undertaken for 2023 base year, 2033 forecast year, 2033 forecast year including committed development and 2033 forecast year including committed development and proposed development.

23. No survey data has been appended to the TA. To allow the LHA to review the baseline data used, the raw 2023 survey data must be appended to the TA.

24. Once this data has been provided, the LHA can complete their review of the junction operation assessments.

25. Furthermore the TA states that the following TEMPRO factors have been used to uplift the base traffic forecasts to 2033: -

AM – 1.0578

PM – 1.0598

26. The LHA consider that the TEMPRO factors should be higher than those stated in the TA. Therefore the applicant must confirm which TEMPRO parameters were used to determine these factors.

Mitigation

27. A Framework Travel Plan has been submitted as part of the application which will promote sustainable travel. This will be reviewed by the Travel Planning team at West Berkshire Council and comments will be provided separately.

RECOMMENDATION: -

28. The LHA consider the proposed footpath from the development to Theale High Street as unacceptable due to lack of overlooking from the proposed buildings. Furthermore the following additional information would be required:

- The proposed internal footways must include the provision of dropped kerbs and tactile paving. This must be clearly shown on the proposals plan.
- To allow the LHA to review the baseline data, the raw 2023 survey data must be appended to the TA.
- The LHA consider that the TEMPPO factors should be higher than those stated in the TA. Therefore the applicant must confirm which TEMPPO parameters were used to determine these factors.

Best wishes

Proposal: Full planning application for the construction of 2 employment units for flexible uses within Class E (light industrial), B2 and/or B8 of the Use Classes Order (including ancillary office provision) with associated enabling works, access from Hoad Way, parking and landscaping

Application Reference: 24/00145/FULMAJ

National Highways Ref: NH/24/05148

Dear Emma,

I refer to your e-mail dated 19 February 2024 consulting us on the above planning application.

National Highways has been appointed by the Secretary of State for Transport as strategic highway company under the provisions of the Infrastructure Act 2015 and is the highway authority, traffic authority and street authority for the strategic road network (SRN). The SRN is a critical national asset and as such National Highways works to ensure that it operates and is managed in the public interest, both in respect of current activities and needs as well as in providing effective stewardship of its long-term operation and integrity.

In the case of this development proposal, our interest is in the M4 motorway and in particular M4 Junction 12.

Please see attached our response in the attached NHPR.

Regards

Mrs Beata Ginn

Council's Reference: 24/00145/FULMAJ

Location: Land Bounded by Hoad Way and M4 and High Street Theale Reading

Proposal: Full planning application for the construction of 2 employment units for flexible uses within Class E (light industrial), B2 and/or B8 of the Use Classes Order (including ancillary office provision) with associated enabling works, access from Hoad Way, parking and landscaping

National Highways Ref: NH/24/05148

Referring to the consultation on the planning application referenced above, in the vicinity of the M4 that forms part of the Strategic Road Network, notice is hereby given that National Highways' formal recommendation is that we:

- ~~a) offer no objection (see reasons at Annex A);~~
- ~~b) recommend that condition should be attached to any planning permission that may be granted (see Annex A – National Highways recommended Planning Conditions & reasons);~~
- c) recommend that planning permission not be granted for a specified period (see reasons at Annex A);**
- ~~d) recommend that the application be refused (see reasons at Annex A)~~

Highways Act 1980 Section 175B is not relevant to this application.¹

This represents National Highways' formal recommendation and is copied to the Department for Transport as per the terms of our Licence.

Should the Local Planning Authority not propose to determine the application in accordance with this recommendation they are required to consult the Secretary of State for Transport, as set out in the [Town and Country Planning \(Development Affecting Trunk Roads\) Direction 2018](#), via transportplanning@dft.gov.uk and may not determine the application until the consultation process is complete.

The Local Planning Authority must also copy any consultation under the 2018 Direction to PlanningSE@nationalhighways.co.uk.

Signature:

Name: Mrs Beata Ginn

Position:

Area 3 Assistant Spatial Planner
National Highways

planningSE@nationalhighways.co.uk

National Highways

Bridge House, 1 Walnut Tree Close, Guildford, Surrey, GU1 4LZ

Beata.Ginn@nationalhighways.co.uk

¹ Where relevant, further information will be provided within Annex A.

Annex A **National Highways' assessment of the proposed development**

National Highways has been appointed by the Secretary of State for Transport as a strategic highway company under the provisions of the Infrastructure Act 2015 and is the highway authority, traffic authority and street authority for the Strategic Road Network (SRN). The SRN is a critical national asset and as such National Highways works to ensure that it operates and is managed in the public interest, both in respect of current activities and needs as well as in providing effective stewardship of its long- term operation and integrity.

National Highways is concerned with proposals that have the potential to impact on the safe and efficient operation of the SRN, in this case the M4 motorway.

We have reviewed documentation available on your planning portal, however, we require further information to enable further assessment to be undertaken:

- VISSIM modelling note as mentioned in paragraph 7.8 of the Transport Assessment

Also, a confirmation of the following:

- The committed developments included in the traffic forecasts.
- The development's opening year.

Recommendation

National Highways recommends that Local Planning Authority does not grant planning permission for the application (Ref: 24/00145/FULMAJ) until 3 May 2024 to enable further assessment to be undertaken. This does not prevent the authority, if they so wish, to either refuse the application or agree an extension of time beyond 3 May 2024.

Standing advice to the local planning authority

The Climate Change Committee's [2022 Report to Parliament](#) notes that for the UK to achieve net zero carbon status by 2050, action is needed to support a modal shift away from car travel. The NPPF supports this position, with paragraphs 73 and 105 prescribing that significant development should offer a genuine choice of transport modes, while paragraphs 104 and 110 advise that appropriate opportunities to promote walking, cycling and public transport should be taken up.

Moreover, the build clever and build efficiently criteria as set out in clause 6.1.4 of [PAS2080](#) promote the use of low carbon materials and products, innovative design solutions and construction methods to minimise resource consumption.

These considerations should be weighed alongside any relevant Local Plan policies to ensure that planning decisions are in line with the necessary transition to net zero carbon.

Comments Details

Comments: Thank you for consulting Transport Policy on this application.

I am aware that the site was formerly identified as a potential site in the 2000 version of the HELAA, but not included as part of the latest update to HELAA prepared in January 2023. It is also not included in the Regulation 19 submission version of the Local Plan Review (2022-2039). I would suggest that the views of the Planning Policy team are sought regarding this.

The application is similar to a proposal for three units considered in 2021 (ref 21/02029/COMIND), for which I submitted comments. It is my understanding that this application was withdrawn.

Site location and accessibility
The site lies immediately to the east of Theale and is bounded by Hoad Way, the A4 Theale Bypass, the M4 and the High Street. The proposed access to the site will be from Hoad Way, which will connect with the existing footway network.

The site lies close to Theale village centre, which contains a range of local shops and facilities and the whole of Theale village is within comfortable walking distance of the site. The stretch of High Street bordering the site on the NW side forms part of a pedestrian and cycle route that crosses the M4 motorway via a footbridge to connect with Pincents Lane in Calcot. The route forms part of a Strategic Cycle Route identified in the joint Reading Area Local Cycling and Walking Infrastructure Plan (LCWIP), prepared by Reading BC in partnership with West Berkshire and Wokingham.

The section of the route via the High Street and the M4 footbridge, allows most parts of the Calcot area to be within a 2km acceptable walking distance of the proposed site entrance on Hoad Way.

In terms of cycling access, a number of residential areas, including all of Theale and Calcot, most of Tilehurst and western parts of the Reading Borough area would be within a comfortable 5km cycling distance.

The Transport Assessment outlines that the proposed level of cycle and motorcycle parking will be in accordance with the Council's own standards. This is welcomed, and I will leave it to Highways Development Control to determine the suitability of the proposed provision.

The site would be well served by bus stops in Theale High Street, around 200m from the proposed site entrance on Hoad Way. These would be served by Reading Buses' Jet Black1 service, which provides a good level of services east A4 corridor into Central Reading, and west towards Thatcham and Newbury. These typically run half-hourly and provide early morning/late evening services Monday to Saturday, with an hourly Sunday service.

Theale Station is around 800/950m walk from the site and provides regular services to Newbury, Thatcham and Reading Station. At the current time, the Council, Network Rail and GWR are currently undertaking improvements to passenger facilities at the station. These include the provision of a new footbridge with lifts, a new station building (including a retail unit) and a secure, covered cycle hub.

The above indicates that the site is in an accessible location and is well-connected to nearby bus and pedestrian/cycle routes.

Site Layout

I note from the application plans that there will be a pedestrian/cycle connection to the High Street on the north side of the site boundary. This is welcomed as it would provide better connections, via the M4 footbridge to Pincents Lane, to communities to the north of the M4 (e.g. Calcot and Tilehurst).

I do, however, note concerns from Highways Development Control regarding the proposed buildings not overlooking onto the High Street. I agree with these concerns as the section past the barriers at the end of the High Street to the M4 footbridge can have an isolated feel (particularly after dark). My comments to the previous application stated that the design of the site ideally should be designed in a way that overlooks the High Street, thus providing natural surveillance for the pedestrian/cycle route. The provision of such natural surveillance would assist in helping improve the personal security along the route and may help reduce actual crime or fear of crime, thus making it more attractive for walking and cycling journeys. I would view this as essential given the route's status as a Strategic Cycle Corridor in the joint Reading LCWIP.

Framework Travel Plan

A Framework Travel Plan (FTP), prepared by David Tucker Associates (16th August 2003), has been submitted as part of the application. This is welcomed and will need to build on the accessible nature of the site by maximising opportunities for sustainable travel to/from the site. However, there are a few issues in the FTP that would need to be addressed before it can be considered acceptable.

3.3.3 – The M4 'Smart Motorway' scheme has now been completed.

3.5.3 – The Council, in partnership with Network Rail and GWR are currently undertaking a project to improve passenger facilities at Theale railway station. These works should include the provision of a secure cycle hub, which will significantly improve the cycle parking at the station.

4.2.2/3 The FTP contains initial modal shares based on 2011 Census Journey to Work data, with a headline target for a 10% reduction in single occupancy vehicle journeys over 5 years. The initial FTP target will be refined once the results of the baseline survey are known. It is assumed that the 10% reduction in SOV journeys will be maintained.

It is unclear from the FTP when the baseline monitoring is to take place. This needs to be included. It is assumed that annual monitoring will take place for a minimum of five years after the baseline survey. In addition to the annual monitoring, the TPC should monitor occupancy levels of the cycle parking areas

and look to increase provision if demand suggests. The Council will require results of these surveys, plus details of any proposed changes to the plan or its targets.

Table 3 summarises a toolkit of travel plan initiatives that will be adopted by the site Travel Plan Coordinator. This is welcomed, but the following should be considered in addition to the measures listed:

- Consideration should be given towards providing showers and changing facilities in each unit for staff cycling and walking to work.
- Consideration be given for both units to introduce an employee cycle scheme. Such an initiative would allow employees to benefit from the assisted purchase of cycles and equipment to encourage cycling to work. The introduction of such a scheme would be consistent with similar employment sites elsewhere in the district. This is pertinent given that there is a wide catchment area, covering Theale, Calcot, most of Tilehurst and other parts of western Reading that are within an acceptable 5km cycling distance of the site.

Conclusion

The site is in an accessible location with access to local walking, cycling and public transport routes. The footpath connection to the High Street on the north site boundary is welcomed, however the design of the proposed units should be reviewed so that is able to overlook this route to help improve natural surveillance and personal safety.

The FTP submitted will need to maximise the site's accessibility. Further details are sought prior to this being considered acceptable. These include a commitment towards providing an employee cycle to work scheme, plus confirmation regarding baseline monitoring and reporting arrangements.

Chris Sperring
Principal Transport Policy Officer

Kind regards

Appendix E
