

**Stay safe with
Emollient Creams**

Emollient products may contain paraffin or other ingredients, such as shea or cocoa butter, lanolin, nut oil or mineral oils, which can leave a flammable residue that absorbs into clothing and fabrics.

Know how to reduce the fire risks caused by emollients.

Scan the QR code for fire safety advice.

If you're concerned about your emollient products, please speak to a GP, family member, carer, or Royal Berkshire Fire and Rescue Service to arrange a Safe and Well Visit at safeandwell@rbfrs.co.uk.
