

# Advice for homes with High Fire Loading

Fire loading refers to the amount of combustible materials there are in a space. Homes with high fire loading have the potential for a fire to spread more rapidly.

**By following our simple steps, you can make yourself and others safer inside your home.**

**Scan the QR code for fire safety advice.**

In the event of a fire, get out if you can and **call 999**. If you would like some further support and assistance, you can contact Royal Berkshire Fire and Rescue Service to arrange a Safe and Well Visit at [safeandwell@rbfrs.co.uk](mailto:safeandwell@rbfrs.co.uk).
