

Fire safety advice for Oxygen Users

Oxygen is not flammable, however it does support combustion. This means that oxygen makes things burn and ignite more easily.

Know the precautions you need to take when using and handling medical oxygen equipment.

Scan the QR code for fire safety advice.

In the event of a fire, immediately vacate the premises. Only take your oxygen equipment with you if it does not hinder you. **Call 999** and ask for the Fire Service. Tell them that you are using medical oxygen.
